REASONS FOR ALLOWANCE

1. Claims 1-10 are allowed.
2. Claims 11-24 are canceled.
3. The following is an examiner's statement of reasons for allowance:

The prior art of records fails to disclose or render an obviousness of a method for initializing or zeroing an accumulator value comprising: routing signals concentrated in a particular area of a programmable logic resource; applying a multiplying operation to the signals; applying the feedback wherein initially set to zero; concatenating first pair of input signals; concatenating the feedback output onto the end of the concatenated first pair of input signals; applying an accumulate operation on the results; and storing the result for use as an initialized or zeroed accumulate value as seen in independent claims 1 and 8.

The closest found prior art are references by Owen et al. (U.S. 4,876,660) in view of Simkins et al. (U.S. 2005/0144215 A1). Owen et al. in view of Simkins et al. also disclose the method for initializing or zeroing an accumulator value. However, Owen et al. in view of Simkins et al. fail to either expressly or inherently disclose the step of concatenating the feedback output onto the end of the concatenated first pair of input signals as seen in the above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
